In this exercise, you open a 3D PDF file in Adobe Acrobat 9 and see how easy it is to work with rich 3D content without the need for complex CAD, CAM, or CAE applications. Convert Web Pages to Adobe PDF Have you ever printed a page directly from the Web and discovered with horror that the finished product is similar to the original version on the screen? Instructions for Creating Ready-to-Print PDF Files in Adobe Acrobat 9 Choose one: a) Pay a wad of cash to a professional printer for great results from your PDF file. b) Keep some of that money in your pocket by following Adobe Creative Team's recommendations on how to prepare the file before you put it in pdf. It's your call. Working with Bookmarks in Adobe Acrobat 9 can take a lot of time to navigate a large PDF document. Creative Team shows you how to use the location feature in Acrobat 9 to create and speed up things to edit, allowing you to quickly click on the page you want. Chapter By Section PDF Portfolios Combining Files (PDF) Part 11: Creating Multimedia Presentations (PDF) SiteGrinder 2 — Photoshop Plugin Review by Jennifer Apple often seems to be a tight part of business labor in the world of web design and development. Creative professionals tend to stick to the Photoshop domain, while those who are knowledgeable about scripting are left to the task of implementing their work. Indeed, the two realms are quite different from each other, which any of us can easily prove even vaguely familiar with either. In fact, Photoshop is an unintended design studio that offers the artist a seemingly endless range of creative options. On the other hand, follow strict rules of interaction with HTML, CSS, Java and so on, requiring the developer to take into account any number of esoteric concerns in order to ensure that the designs are properly displayed on the web. Turn Photoshop into a Complete Web Design Tool SiteGrinder 2, aiming to close this gap between design and development. Basically, this program transforms photoshop into an easy-to-use and fully functional web design tool. With SiteGrinder 2, designers will now have the freedom to completely loose their creativity and then allow, without jumping on a beat, to transfer their designs to the web. Bringing aesthetic concerns along with more practical considerations, this program is an incredibly powerful tool that will make cheats a fantastic addition to any web designer bag. So how does it work? Think for a second about the normal flow of work for any web design project. You'll spend most of your time designing the visual look of your website in Photoshop, just going back and working with a code editor like Dreamweaver or GoLive, going through the labor-intensive process of restructuring those designs for the web. Not to mention the fact that your creativity is often significantly limited when using a completely separate design program from the program used to prepare everything for the web. Everything you design won't be functional when translated into the web and won't be compatible with all web browsers! So because you know that your web developer needs to work again to make sure your designs can be used online, you'll often find that you don't use this extra creative spindle. Create your Web Pages directly from Photoshop SiteGrinder 2 throws all these considerations in the wind. By creating web pages directly from Photoshop, you'll be able to spend a lot more time on the creative end of the spectrum, because you can learn right away how well certain designs are translated into the web. Once you've received a phone call from your development team, don't go back to the Photoshop drawing board and tell you that what you envision is not a chance to appear on the web. You can immediately visually and interactively test your designs, which Make changes to esthetics or functions when the design process is relatively early. With SiteGrinder 2, you can easily convert Photoshop Type layers to CSS-style web text. Almost all of Photoshop's character and paragraph styles are supported by CSS, so you can seamlessly transition from workspace to web browser. This includes everything from thick and italic to paragraph spacing and alignment. Even hyperlinking is easy done, as SiteGrinder 2 will automatically turn any HTTP and email URLs into hyperlinks. Create Buttons, Rollovers, Popups & Menus Likewise, SiteGrinder 2 automatically converts image layers to web graphics, automatically creating the HTML needed to display your images exactly where you're positioned in Photoshop. With all the basic elements of any standard website also allows you to create Photoshop, buttons, rollovers, pop-ups and menus, it's easy to get using SiteGrinder 2. Almost all you have to do is say that adding layers name hints about the specific layers of siteGrinder 2 - only the layer name button, rollover or pop-up layer contains your name and SiteGrinder 2 will automatically create the interactive feature of your choice. No Tables Here - SiteGrinder produces current XHTML 1.1 and is also a breeze to create a multi-page website from a single Photoshop document, using a Photoshop tool called the CSS Layer Comps palette. Often overlooked, this incredibly powerful little tool allows you to record and name specific document statuses, including the location and visibility of each layer. To create multiple pages, all you have to do is make the document appear the way you want a page on your site to appear, and then create a layer composition — then set the next page and test another layer, and so on. SiteGrinder 2 will then use these comps to figure out what is included in the web pages it will produce for you. It's that easy! SiteGrinder 2 effectively functions as its very own web technician who knows everything you need to know about CSS, HTML, and other complex web formats. SiteGrinder 2 can do all this work for you when you don't need to spend valuable time and money learning the intricacies of talking to the web, you know very well with much more time and freedom to explore the limits of your creative potential in the world of photoshop. Pricing and Availability mac OS X and SiteGrinder can now download windows versions of the openable demo. SiteGrinder 2 Media Lab can be ordered from the online store. Store.
